## Education

### Bsc (Hons) in Information Systems

University Of Colombo School Of Computing

C.G.P.A - 3.38

2022 - present

### G.C.E Advanced Level - 2020

Z- Score - 1.39

A - ICT

B - Mathematics

S - Physics

Anula Vidyalaya Nugegoda

### G.C.E Ordinary Level - 2017

9As

Anula Vidyalaya Nugegoda

## Skills

### Web development

ReactJs, Express JS, NodeJS, Javascript, HTML, CSS, Bootstrap, Bulma CSS, Tailwind CSS, Spring Boot

### Programming Languages

C, Java , Python, R, PHP

## About me

As a fourth-year Information Systems undergraduate, I am passionate about enhancing my development skills through both academic coursework and self-study. I am actively seeking opportunities to apply my technical knowledge to real-world projects. With a strong foundation in development and well-honed soft skills, I am confident in my ability to contribute effectively to any team and drive success.

## Experience

### Software Engineer (Internship)

Entgra

2024 Nov- 2025 May

- As a Software Engineer Intern at Entgra, I used my scripting skills to automate and optimize workflows, contributed to the development of robust APIs and services, while also resolving critical bugs. Furthermore, I was involved in the design of a new product. During my internship I was able to gain first-hand experience in the full development lifecycle with exposure to both frontend and backend development and developed proficiency in Linux environments.

**Technologies: React, Java, Swagger, Postman**

### Software Engineer (Volunteer)

Dev Team AIESEC Sri Lanka

2024 - Present

As a developer within AIESEC Sri Lanka's dynamic team, I applied software engineering principles to deliver impactful solutions. My notable contributions include:

- UTM Tracking Integration: Successfully implemented UTM tracking to provide detailed analytics, enabling data-driven decision-making for marketing campaigns.
- Signup Page Design and Development: Designed and developed an intuitive signup page, focusing on user experience and accessibility, to streamline the onboarding process for new members

**Technologies: React, Javascript**

## Projects

### StayMate - Property Management System

2024 - present

Contributed to the development of the technician module in a property management system, enabling efficient management of maintenance tasks, assignment of technicians to jobs, and real-time progress tracking of active work.

Technologies - ReactJS, Express JS , NodeJS, MongoDB

## JobLinkUp - Job Portal

2023 - 2024

My team and I developed a comprehensive job portal that connects job seekers with opportunities and enables recruiters to efficiently hire candidates.

Technologies - HTML, CSS, Javascript, PHP (MVC Architecture)

[Repo Link](#) [URL](#)

## Library Management System

2023

I developed a simple Java-based library management system to reinforce my understanding of object-oriented programming concepts. The system facilitates key functionalities such as member registration, book borrowing, and other essential operations within a library.

Technologies - Java
